Art Unit: 1615

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 32-34, 38-40, 44, 48 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bezwada et al 5464929.

Bezwada provides bio-absorbable wax, for drug administration (col. 7, lines 28-45) and includes embodiments of the instant invention, since that starting ingredients are the same: polybasic acids or anhydrides thereof, (col. 4, lines 20-33) with esters formed of polyols and fatty acids (col. 3, lines 11-39).

The coupling agents at col. 4, lines 26-29, which impart desirable properties cause branching. These agents are inclusive of polyols and of acids, thus forming ester branches- "trimethylol propane – tetra carboxylic anhydride."

The waxes are biodegradable (col. 5 lines 22-33) and absorbable; the melting point must thus be below the instant 70°. However, one is taught to adjust the polymerization temperature to provide the desired properties, inclusive of molecular weight (col. 9, lines 53-61). Utility includes medical/surgical devices, but also sutures, swage (col. 5, lines 35-38) but also, the instant drug carrier (col. 7, lines 20-60). The specific polyols of claim 35, however, is not evident. Drugs are at col. 7. Copolymers are mentioned at col. 4, lines 20+.

Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

39 reiterate what is already in 32.

Claims 35-37, 41-43, 45 and 57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments with respect to claims 32-45, 48, 57 have been considered but are moot in view of the new ground(s) of rejection.
